

ARCXIS Success Stories: Providence Homes

## Designing For A More Energy Efficient Future

**\$8,500,000+**

**saved in energy bills  
for Jacksonville families**

**Hers Index Scores 50**  
as low as  
**HERS Carbon Index Scores 58**  
as low as

**4.9 STAR**

**Customer Satisfaction Rating**

### REDUCED CARBON FOOTPRINT

Energy efficient homes help  
offset greenhouse gas emissions.

Each home sequesters as much carbon  
as **34 trees** growing for 10 years! \*

### How ARCXIS Helped Providence Homes Achieve Energy Efficiency Excellence

When Bill Cellar first became a builder in Northeast Florida, he did so with a personal pledge to make a difference in the industry. He created Providence Homes with a commitment to building beautifully designed homes at affordable prices, and to building every home with the same attention to detail and reliability he would with his own home. In the hot and humid climate of Florida, one of the biggest challenges is delivering industry leading energy efficiency and customer comfort. Providence Homes has found the blueprint for success thanks to their unwavering commitment to their customers and a helping hand from the team at ARCXIS.

ARCXIS has partnered with Providence Homes for over 15 years, providing tailored HVAC design and feature optimization for energy efficiency, training for the Providence team and their local trades, and inspections for ENERGY STAR, Indoor AirPLUS, and Zero Energy Ready Homes certification.

ARCXIS' Eastern Region President, Shan Mize, credits the Providence Team's integrated approach for their success- "We provide the Providence Homes team with HVAC designs tailored on a per lot basis for each and every single home they build. But an HVAC design is only ever as valuable as the person who inspects it, so we follow up with inspections and testing to further ensure that the system is installed correctly and fully optimized before the Providence Homes team deliver the home to a family. This integrated approach allows us to help them achieve an unparalleled level of comfort and energy efficiency."

*"Partnering with ARCXIS to utilize integrated HVAC Design with inspections and testing has improved the overall quality of our construction whilst reducing warranty costs, improving customer satisfaction, and honoring our commitment to energy efficiency. ARCXIS holds our HVAC installers accountable, giving us peace of mind that we are delivering the highest quality and most comfortable home possible to a family."*

— Charles Roberts, VP of Operations, Providence Homes, Jacksonville, Florida

ARCXIS is the nation's number one engineering and inspections firm, touching 1 in every 7 new homes, and operating in over 28 states. We provide builders-through the full Arc of the construction process – with services aligned around the Axis of helping build better quality homes, more quickly, at lower cost, and with less risk.
